Administration of Authorised Medication Policy

NQS

QA2

2.1.1 Each child’s health needs are supported.

2.1.4 Steps are taken to control the spread of infectious diseases and to manage injuries and illness, in accordance with recognised guidelines.

2.3.2 Every reasonable precaution is taken to protect children from harm and any hazard likely to cause injury.

National Regulations

Regs

90 Medical conditions policy
91 Medical conditions policy to be provided to parents
92 Medication record
93 Administration of medication
94 Exception to authorisation requirement - anaphylaxis or asthma emergency
95 Procedure for administration of medication
96 Self-administration of medication

My Time, Our Place

LO3 Children take increasing responsibility for their own health and physical wellbeing

Aim

Our Service and our educators will only administer medication to a child if it is authorised or the child is experiencing an asthma or anaphylaxis emergency. We recognise it is essential to follow strict procedures for the administration of medication to ensure the health, safety and wellbeing of each child using the service.

Implementation

Our service and educators will only administer medication to children if it is authorised by parents (or by someone authorised by parents on the enrolment record to make decisions about the administration of medication). If there is a medical emergency, we will also administer medication when authorised verbally by a parent, medical practitioner or an emergency service, however we may administer medication during an asthma or anaphylaxis emergency without first receiving authorisation.

Medication under the Regulations includes medication covered by the Therapeutic Goods Act 1989. Therapeutic goods include those for therapeutic use to:

- prevent, diagnose, cure or alleviate a disease, ailment, defect or injury
- influence, inhibit or modify a physiological process.

This covers products like sunscreen and nappy cream.

The Nominated Supervisor will ensure a copy of this policy is provided to parents when they enrol their child.

Administration of Medication (non-emergency)

Educators will administer medication to a child:

1. if the medication is authorised in writing by a parent or another authorised person and
   - is in the original container
   - has not expired
   - has an original label and instructions that can be clearly read and, if prescribed by a doctor and has the child’s name
   - is administered in accordance with any instructions on the label or from the doctor.
2. after the child’s identity and the dosage of the medication is checked by an educator who is not administering the medication. This educator will witness the administration of the medication.

Medication must be given directly to an educator on arrival for appropriate storage.

Children over pre-school age

Our service permits children over preschool age to self-administer medication if this is authorised by the child’s parent or another authorised person (refer to our Medical Conditions Policy). Educators will:

1. advise child to take their medication or child will get permission from educator that they may take their medication
2. supervise children administering the medication
3. complete the medication record.

Over the Counter Medication (non-prescription medication)

Our service does not administer over the counter medication unless it has been prescribed by a medical practitioner and there is a letter from the doctor explaining the purpose of the medication. Medication may mask the symptoms of other, more serious illnesses and our educators are not qualified medical professionals.

Respect, Caring, Resilience, Love of Learning, Honesty, Positivity
However, we will administer sunscreen without prescription by a doctor if a parent or authorised person authorises this.

**Administration of Medication in emergencies other than anaphylaxis or asthma emergencies**

1. Educators will administer medication to a child in an emergency:
   - if a parent or another authorised person verbally authorises the administration of the medication or
   - they receive verbal authorisation from a registered medical practitioner or emergency service if the parent or authorised person cannot be contacted.
2. The child will be positively reassured, calmed and if possible, removed to a quiet area under the direct supervision of a suitably experienced and trained educator.
3. The Nominated Supervisor will contact the child’s parent, and will ensure an Incident, Injury, Trauma and Illness Record is completed.

Educators will not administer medication if parents provide verbal authorisation in circumstances that are not emergencies. If educators are unsure whether they should be administering a medication in an emergency after receiving verbal authorisation from a parent or responsible person, educators will obtain authorisation from a registered medical practitioner or emergency service.

**Administration of Medication during Anaphylaxis or Asthma Emergencies**

1. Educators may administer medication to a child in an anaphylaxis or asthma emergency without authorisation.
2. The child will be reassured, calmed be under the direct supervision of a suitably experienced and trained educator who will immediately administer appropriate medication.
3. The Nominated Supervisor will contact emergency services as soon as possible and then the child’s parents/carers.
4. Where ever possible the other children in the Service will be removed from sight of the emergency.
5. The Nominated Supervisor will ensure the service completes an Incident, Injury, Trauma and Illness Record and contact WorkSafe Victoria if necessary.

**Medication Record**

Educators will complete a Medication Record with the name of the child which:
- contains the authorisation to administer medication or for the child to self-administer the medication
- details the name of the medication, the dose to be administered and how it will be administered, the time and date it was last administered, and the time and date or circumstances when it should be administered next
- if medication is administered to a child (including during an emergency), details the dosage that is administered and how it is administered, the time and date it is administered, the name and signature of the person that administered it, and the name and signature of the person that checked the child’s identity and dosage before it was administered and witnessed the administration.
• if medication is administered by a child that is authorised to self-administer medication, details the dosage the child took and how, and the time and date it was taken.

We will use the Medication Record template published by the national authority ACECQA currently at http://www.acecqa.gov.au/SearchResults.aspx?keywords=medication+record

If required, we will adapt this Medication Record template to record the self-administration of medication for authorised children over pre-school age (eg in the “name and signature of educator administering medication” columns put N/A for not applicable).
